DPD-2075-61

7 April 1961

MEMORANDUM FOR: Office of Security, DPD

SUBJECT : Request for Clearances - [redacted]

25X1A

1. Limited IDEALIST, CORONA/ARGON and OXCART clearances are requested for [redacted] of the Printing Services Division, Photo Branch, Office of Logistics. [redacted] will be the Agency employee responsible for the microfilming of all [redacted] cables for Archives.

25X1A

25X1A

2. The service of archiving DPD special project cables, as well as the normal command channel cables, had previously been performed by the Records Integration Division, DD/P, through the Office of Communications. We have been informed that the equipment used for this service is now inoperative and it will be necessary to have the work performed at the [redacted] installation. The RID facility will not be repaired until the move to the new CIA building is completed and if we were to wait for that lengthy a period our backlog of archiving would be unwieldy, as well as out of date. A call to [redacted] provided the information that [redacted] will be the only person handling our material.

25X1A

25X1A

3. The briefing should be a very limited one in view of the fact that the nature of the work is such that [redacted] has little or not time to read contents of the material he is developing and it is unlikely that he will retain any information he gains thereby. However, in view of his exposure to the information contained in the cables, we feel the security clearances are required.

25X1A

4. Please advise the Administrative Office when the clearances have been granted and necessary arrangements will be made for the briefing.
